QUICKIE®

Q500M

SUPERIOR MANEUVERABILITY

Q500 M

The Evolution of Mid-Wheel Drive Performance.

RELIABLE

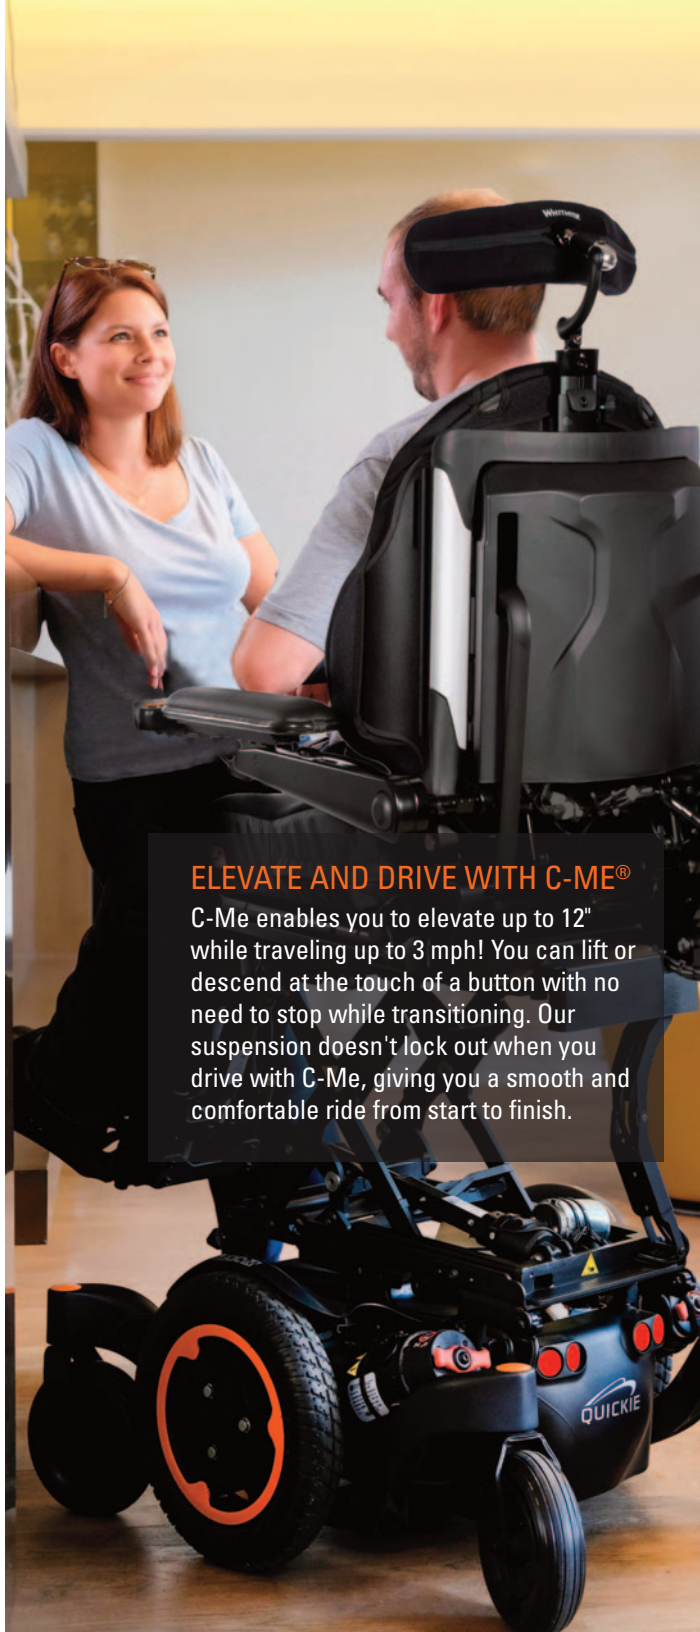

Every Q500 M is built to keep you moving. The chassis is formed from a single sheet of metal, and its steel components receive automotive undercoat plating. The industry's best motors undergo additional end-of-line testing before leaving our factory.

BALANCED

The QUICKIE Q500 M base balances superb indoor maneuverability with outstanding performance. Its powerful motors combined with all-wheel suspension and QUICKIE's smooth ride ensures you have the most comfortable and safest driving experience.

COMFORTABLE

Enjoy a smooth and stable ride, even over uneven terrain, with QUICKIE's patented all-wheel suspension – six independently suspended wheels give you the smooth ride you're looking for. The Q500 M has a 3" ground clearance and the best traction even when ascending gradients of up to 7°.

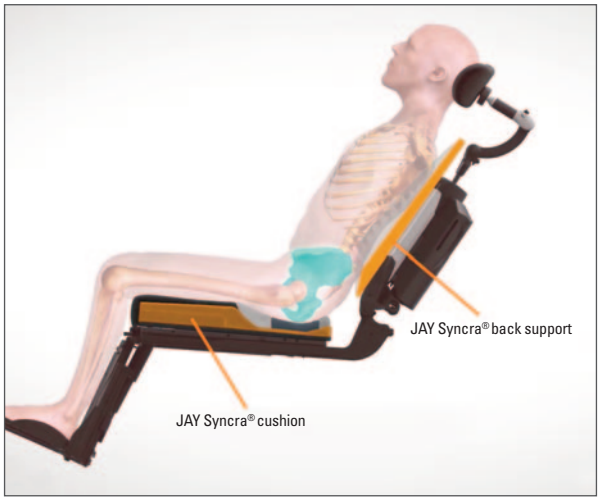

ELEVATE AND DRIVE WITH C-ME®

C-Me enables you to elevate up to 12" while traveling up to 3 mph! You can lift or descend at the touch of a button with no need to stop while transitioning. Our suspension doesn't lock out when you drive with C-Me, giving you a smooth and comfortable ride from start to finish.

SEDEO® PRO™

Truly modular in design, the SEDEO PRO seat frame provides a new level of functionality, comfort, and design. For moderate to complex clinical needs, the PRO combines a highly adjustable seat frame with an excellent choice of postural support options.

JAY SYNCRA®

Exclusive to the SEDEO PRO Series, JAY Syncra® seat and backrest cushions are specifically designed for optimal performance when tilt is used together with power recline. Featuring a lower rear pelvic wall, deeper leg troughs, a scalloped lower backrest shell, and tapered backrest foam, JAY SYNCRA is uniquely engineered to maintain the proper pelvic position throughout the seat movements.

SEDEO® LITE™

The SEDEO LITE is an adjustable seat frame with a sleek look. Its minimal design alleviates weight capacity concerns when using aftermarket equipment. Traditional back canes are width-adjustable from 15" to 20" and easily fit JAY® backs. An array of options covers mild to moderate clinical needs, and intuitive adjustability meets individual requirements.

CAPTAIN SEAT

The Captain Seat provides a relaxed sitting position and features a semi-recline fold-down back, adjustable seat depth, and a convertible seat pan that allows you to use your preferred cushion. Available with a 50° tilt and power centermount leg support.

Q500 M SEAT FRAME COMPARISON
